Sesto F.no (Firenze)

Conference room Querzoli

## Prof. Sveva Avveduto

Director, Institute for Research on Population and Social  
Policies of the Italian National Research Council (IRPPS-  
CNR)

## ABSTRACT

The seminar will focus on the themes of women's participation in the scientific enterprise in its various aspects. Some data will be presented relating to university education and the presence of female researchers in STEM areas also in the international context. Having noted their limited presence, we will refer to some initiatives for a possible overcoming of gender diversity in careers starting from the single institution up to the implementation of a broader scientific policy.
